
Evasion band at $f = 0.5$ (exact tie): markers are the measured grid, not a curve
math500 (C = open)
medqa (C = 4)
mmlu (C = 4)
best evasion (below ceiling): $\hat{q}$ = 0.160, acc 0.366
but the global optimum is ABOVE the ceiling ($\hat{q}$ = 0.810, acc 0.000):
the gate is not what the adversary has to defeat here
3 distinct $\hat{q}$ in [0.15, 0.4]
20/36 honest pairs powered (R2)
best evasion (below ceiling): $\hat{q}$ = 0.280, acc 0.082
3 distinct $\hat{q}$ in [0.15, 0.4]
16/36 honest pairs powered (R2)
best evasion (below ceiling): $\hat{q}$ = 0.280, acc 0.374
3 distinct $\hat{q}$ in [0.15, 0.4]
3/36 honest pairs powered (R2)
honest ceiling 0.198
honest ceiling 0.677
honest ceiling 0.677
chance $1/(C-1) = 0.333$
chance $1/(C-1) = 0.333$
